Defining Storm	15 &	other	Weather	Events.
----------------	------	-------	---------	---------

Name____

In the space provided, draw a picture of what you think a severe weather event would look like. Write
a caption that describes your event.

Trouble Brewing in the Earth's Atmosphere 2. What is the Aerosonde? 3. How does the Areosonde help researchers, what are the benefits of it?

- 4. Explain these terms:
 - Weather
 - Storm
 - Hurricane
 - Tornado
- 5. What would make a storm noteworthy?

Critical Thinking

6. Create a method or scheme that you could use to determine whether an event is a minor storm or if it has reached Monster Storm status. Try to come up with 5 variables that you could use to measure a storm. Is your method practical?

7. If you have time left, add some of the highlighted vocab from the mission briefing (p. 8-10) to your drawing on the front page. Use what you now know to make your caption better. Feel free to add more to your drawing too!
